

# Delmarva Power Customer Relief Fund

**Delmarva Power is working with local nonprofits to provide meaningful relief for those challenged by higher energy costs with the Delmarva Power Customer Relief Fund. Find out if you're eligible for assistance.**

## Program Overview

The Delmarva Power Customer Relief Fund is designed to support individuals and families in need of support as energy costs rise. Changes in living expenses can be challenging to manage, and this fund is designed to provide support for limited- to moderate-income customers.

The fund in Delaware is made possible through a one-time, \$4.5 million charitable contribution from Exelon, Delmarva Power's parent company, to the Delaware Energy Fund, and is designed to support limited- to moderate-income customers.

The Delaware Energy Fund was established this year through collaboration by government, utilities and community organizations, including Governor Matt Meyer and the Delaware Sustainable Energy Utility (SEU). The Delaware Sustainable Energy Utility manages the Delaware Energy Fund and will administer the grants through the newly launched fund and assist eligible customers with applying.

### How to Apply

The Delmarva Power Customer Relief Fund is available to eligible limited- and moderate-income customers. Eligible customers may receive up to \$300 in relief. To learn more and begin the application process, customers can visit [delmarva.com/ReliefDE](https://delmarva.com/ReliefDE).

### Eligibility

To be eligible, a customer in Delaware must meet the following criteria:

- Active residential customer
- Household that is either limited- or moderate-income
  - **Limited income:** 60% of State Median Income
  - **Moderate income:** Between 60% of State Median Income and 350% of Federal Poverty Level
    - Carry a balance of at least \$250
- Participate in the Energize Delaware Home Energy Checkup and Counseling (HEC2) program

## Energy Affordability with Delmarva Power

The Delmarva Power Customer Relief Fund is part of our broader commitment to making energy more affordable during a time of rising demand. We understand that the energy services we provide are essential, and we're dedicated to continuing to support those we serve by providing reliable, affordable energy. A variety of factors are impacting energy costs including extreme weather and increasing energy supply costs as demand rises and supply is not there to meet it. Any increase in household expenses can be difficult, and we are here to help keep energy costs manageable for customers and communities.
